What Is Guard Watch

Guard Watch systems provide a feature to check and record the time of a guards duty by scanning specific checkpoints mounted on the area he patrols. Checkpoints are placed in specific points either on buildings or on other locations of a site or remote area and help the managing staff to identify each different location and each part of a specific territory. The on-duty guard can scan checkpoints, send SOS alerts, track and record event sand send reports to the managing staff or the clients in real-time.

Why do we need Security Guards?

- Provide monitoring services for a safe environment and prevent violence
- The presence of a security guard at a business can provide peace of mind and a sense of security to the business owner, employees and customers
- Simply having a security guard present is a great deterrent to crime
- Security guards can receive varying levels of training when it comes to actively responding to a crime

Key Challenges of Security Guards

- Over age Guards
- Proper Training
- Irresponsibility
- Falling asleep on duty

Probably 99% complain against the security guards is that they sleep at night instead of doing their duties.

Why We Need Guard Watch Solution

Guard Watch system offers a lot of advantages to your security department. From internal control to guard's performance, it is developed to take your management to a higher level of security patrol operations. It can have a major impact on the quality of your services and internal control.

Guard Watch tour system monitors the activities of the security guards on-site to ensure they are following the schedule and to verify they are covering all sites as assigned. The use of a guard tour system offers multiple benefits, from handling accountability issues, eliminating unreliable information and assumption based decisions, establishing paper-less documentation to guaranteeing the security of information.

Real Time On Line Guard Watch Solution

KRC Technologies

KH-19

OLED

Key Features of KH-19

- ❑ Upload data to cloud management software in real time through GPRS
- ❑ IP67, waterproof and drop resist.
- ❑ ABS+PE double color injection molding
- ❑ Anti-destructive magnetic suction interface charging port
- ❑ Send patrol record to supervisor's email daily
- ❑ Store upto 60,000 logs on the device
- ❑ 1800 mAh battery to support one week of backup on standard use
- ❑ Web based Administration Tools with Multi Branch central control

KH 19 Specifications

Dimension	57*86*28 (mm)
Read distance	3-5 cm
Read time	Less than 0.3 seconds
Battery capacity	1,800 mah
Battery life	Will support about a week on the basis of 400 times per day
Charging time	About 5 hours
Storage	60,000 records
Communication	GPRS real-time upload data to cloud software
Network	4G network or 2G network, optional
Anti-fall	Can still work after falling from a height of 10 meters

Install Checkpoint

Start Patrol
